Malcolm Joaquin Cuady

has successfully completed the online Professional Certificate

Microsoft DevOps Engineering

Now that you have completed the DevOps Engineering Professional Certificate, you stand out with a unique set of skills and knowledge in enterprise DevOps platform engineering. This certificate demonstrates your job readiness and can be shared with your professional network. Throughout this program, you've engaged with instructional videos, assessments, and practical exercises, gaining a deep understanding of key aspects of DevOps engineering, including: architected enterprise Azure DevOps and GitHub governance structures; built reusable CI/CD pipeline templates and event-driven automation frameworks; designed secure container supply chains and IaC module libraries; and deployed full-stack observability and distributed-tracing solutions.

Microsoft

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
