

Malcolm Joaquin L. Cuady

Marikina City, Philippines | jcuady@gmail.com | +63 962 529 4043 | github.com/jcuady

PROFESSIONAL SUMMARY

Results-driven **Lead Full-Stack Developer and Technical Co-Founder** with a proven track record of designing and delivering enterprise-grade, multi-tenant SaaS platforms from concept to production. Specialized in **Next.js, React, TypeScript, ASP.NET Core, Node.js, Supabase, AWS, and Docker**. Experienced in **Agile methodologies, cloud infrastructure management, CI/CD pipelines, AI/ML integration, and RAG system development**. Successfully led full organizational technology transformation, mentored and led 30+ engineers, and drove measurable business growth through digital innovation. Passionate about building scalable, secure, high-performance web applications and automating business operations through modern software architecture.

PROFESSIONAL EXPERIENCE

Lead Full-Stack Developer

Nexvision Innovations Inc. | Philippines | 11/2025 - 06/2026

- Directed end-to-end technical infrastructure modernization across all company platforms, migrating to a scalable enterprise architecture using **Next.js, React, TypeScript, Supabase, Docker, and Coolify**
- Designed and engineered NexBusinessBrain, an enterprise-wide internal RAG AI system using **Qwen/DashScope LLM, Pinecone vector database, LlamaIndex, LlamaParse, LangChain, and FastAPI**, deployed for company-wide AI-assisted operations
- Led design and delivery of 8+ multi-tenant SaaS platforms from scratch spanning logistics, HR management, e-commerce, task management, and marketplace verticals (*platform details under NDA*)
- Managed cloud infrastructure via **self-hosted VPS with Coolify** and leveraged **Supabase Edge Functions** for serverless backend logic; oversaw CI/CD pipelines, environment configuration, and security governance aligned with secure SDLC practices
- Led Agile transformation including sprint planning, daily standups, backlog prioritization, pull request governance, and peer code reviews; removed delivery blockers and mentored **30+ interns**
- Increased company revenue and project delivery capacity by shifting from WordPress-based projects to full enterprise system development

Co-Founder / Lead Full-Stack Developer

Optrizo Digital Solutions - Student-Led Startup (I.T. and Marketing) | Philippines | 2024 - 06/2026

- Co-founded and helped run a student-led digital solutions startup with I.T. and marketing students, delivering CRM automation and business digitalization services to SME clients
- Coordinated cross-functional delivery across developers and marketing contributors using Agile-style planning, backlog prioritization, and stakeholder check-ins to keep client projects on schedule
- Developed a real-time live queueing system using **React, Supabase (AWS), and Twilio API**; integrated **Pancake CRM, BusyBee SMS API, and Make.com** workflow automations for streamlined client operations
- Owned client communication, scope alignment, and multi-project delivery across concurrent engagements until exit in 06/2026

Freelance Full-Stack Developer (Solo) - Ongoing

[Kadokohi Coffee Shop](#) | Philippines | 06/2026 - Present

- Solo-built and continuously maintain a full-stack Progressive Web App that digitally transformed cafe operations from manual ordering and cashier workflows into QR/online ordering, POS, and automated customer notifications

- Designed and delivered end-to-end systems using **Next.js** and **Supabase**, with **PayMongo** payments, SMS/email order automations, branded web presence, and Playwright E2E testing
- Helped increase revenue capacity and operational capital efficiency by enabling higher order throughput, faster checkout, and reduced manual staff workload
- Ongoing freelance retainer: feature updates, bug fixes, SEO/performance improvements, and production support for permanent cafe digital operations

Freelance Full-Stack Developer (Solo) - Ongoing

[Offgrid Lifestyle](#) | Philippines | 06/2026 - Present

- Solo-built and continuously maintain a full-stack merchandise e-commerce platform that digitally transformed manual order-taking and status follow-ups into an online storefront with automated checkout and notifications
- Delivered the complete stack using **Next.js**, **Supabase**, and **Vercel**, with **PayMongo** payment integration, SMS order-status automation, SEO optimization, and Playwright E2E testing
- Helped increase revenue and capital capacity by expanding online sales channels, improving order conversion, and reducing manual order handling costs
- Ongoing freelance retainer: storefront enhancements, payment/order flow support, and permanent digital operations ownership as solo full-stack developer

Freelance Full-Stack Developer (Solo) - Digital Transformation

[MGC Architecture](#) | Philippines | 2025 - Present

- Solo-led digital transformation for an architecture practice by replacing fragmented manual inquiry and costing workflows with a branded portfolio platform, client inquiry system, and interactive construction cost calculator
- Built and maintain the full-stack experience using **Next.js**, **TypeScript**, **Tailwind CSS**, **GSAP**, and **Supabase**, including secure admin content management and lead-capture flows
- Improved client conversion readiness and business capital efficiency by enabling self-serve project discovery, faster inquiry handling, and clearer early cost estimates before commitment

Freelance CRM and Automation Developer

Sole Surgeon | Philippines | 2025

- Built a custom **Airtable CRM** integrated with **Pancake CRM** for end-to-end client management and operational workflow automation
- Created AI-generated marketing ads and promotional video content using **Google Veo 3** and **Runway ML**
- Automated SMS tagging and customer notification workflows to improve response time and operational efficiency
- Conducted full **end-to-end (E2E) testing** using **Playwright** across CRM workflows, automation triggers, and notification pipelines

Freelance Full-Stack Developer (Optrizo Project)

[Hakum Auto Care](#) | Philippines | 2024 - 2026

- Built and revamped a full-stack auto detailing operations platform using **React**, **Supabase**, and **RLS/RBAC** featuring a live queue management system, staff geofenced attendance, multi-branch role-based access controls, customer portal, and integrated POS system
- Integrated **BusyBee SMS** for automated booking confirmations, real-time queue status alerts, and payment and completion notifications across all customer touchpoints
- Produced brand graphic designs and promotional video content using **Adobe Photoshop** and **Premiere Pro**
- Conducted full **end-to-end (E2E) testing** using **Playwright** covering queue management, booking flows, POS transactions, and SMS notification triggers

Project Lead / Full-Stack Developer - DLSU Capstone

Rent Then Drive | Manila, Philippines | 2024 - 2025

- Led a cross-functional capstone team in designing and delivering a cloud-based car rental platform using **FlutterFlow, Firebase, Airtable, and PayMongo API**
- Integrated **TensorFlow and Tesseract OCR** for AI-powered fraud detection and automated identity verification
- Deployed **Make.com** workflow automations and **Power BI** dashboards for real-time operational analytics and reporting

IT Intern - Global Network Operations Center (NOC)

Converge ICT Solutions Inc. | Philippines | 09/2025 - 12/2025

- Supported the NOC through network fault isolation, incident ticketing, and technical documentation for enterprise network operations

Data Analyst Intern

Startek Pasig | Philippines | 06/2023 - 11/2023

- Developed interactive **Power BI** dashboards using SQL queries and statistical analysis (ANOVA) for executive-level data reporting
- Upskilled non-technical statistician supervisors in **Python** programming, bridging the gap between statistical research and data implementation

EDUCATION

Bachelor of Science in Information Technology

De La Salle University, Manila | Manila, Philippines | 2025

- 1st Honors Dean's List (2024-2025); 2nd Honors Dean's List (2023-2024)
- Co-founder, Data Science Society
- **Electives:** Secure SDLC, Design Thinking, Systems Planning, System Continuity and Disaster Recovery

SKILLS

Programming Languages: JavaScript, TypeScript, Python, C#, PHP, SQL, HTML/CSS, Dart, Java

Frontend Development: React, Next.js, Vue.js, Tailwind CSS, Bootstrap, Redux, GSAP, FlutterFlow, Elementor Pro

Backend Development: Node.js, Express.js, ASP.NET Core, Spring Boot, FastAPI, Supabase, Firebase, REST APIs, GraphQL

AI/ML and RAG Systems: Claude, ChatGPT, Cursor, Minimax, Qwen/DashScope LLM, Kimi, Gemini AI, LlamaIndex, LlamaParse, Pinecone Vector DB, LangChain, TensorFlow, Tesseract OCR, ChatGPT API, NLP, Google Veo 3, Runway ML

Automation and No-Code Platforms: n8n, Zapier, Make.com, Airtable, Pancake CRM, Twilio, BusyBee SMS, Stripe, PayMongo, Google Maps API

DevOps and Cloud Infrastructure: Vercel, VPS, Coolify, Docker, Kubernetes, Supabase Edge Functions, GitHub Actions, CI/CD Pipelines, AWS, Netlify, Power BI

AI-Assisted Development (Vibe Coding): Cursor workflows, prompt-driven prototyping, rapid full-stack iteration, AI pair-programming, and automated code generation/refinement

Design and Media: Adobe Photoshop, Adobe Premiere Pro, Figma, Canva

Testing: Playwright, End-to-End (E2E) Testing, Integration Testing, QA Automation

Methodologies and Practices: Agile, Scrum, Design Thinking, Secure SDLC, Multi-Tenant SaaS Architecture, RLS/RBAC, SEO Optimization

CERTIFICATIONS

AWS Academy Cloud Foundations | Amazon Web Services (AWS) | 2025

Databricks Fundamentals and Generative AI | Databricks | 2025

Airtable Admin and Builder Certification | Airtable | 2024-2027

HubSpot Marketing and SEO Certification | HubSpot Academy | 2025

CCNA: Enterprise Networking | Cisco | 2025

Lean Six Sigma Yellow Belt and White Belt | Six Sigma Global Institute

Klaviyo Developer Certificate | Klaviyo

Asana Workflow Specialist | Asana

PROJECTS

NexBusinessBrain - Enterprise RAG AI System *(NDA)*

Internal enterprise AI assistant built on Qwen/DashScope LLM, Pinecone vector database, LlamaIndex orchestration, LlamaParse document parsing, LangChain tracing, and a FastAPI backend with a React + Vite + TypeScript frontend. Deployed for company-wide AI-assisted knowledge retrieval.

NexLogistics and Sklogistics - Multi-Tenant Logistics SaaS *(NDA)*

End-to-end multi-tenant logistics management platform with client-specific tenancy isolation, built on Next.js, TypeScript, Supabase, and AWS cloud infrastructure.

NexHRIS, SorenHRIS, PremiumOutlets - HR and Retail SaaS Suite *(NDA)*

Suite of HR information and retail management SaaS platforms built from scratch. SorenHRIS was commercially sold to an enterprise client as a production SaaS product.

NexTask - Real-Time Project and Task Management Platform *(NDA)*

Collaborative task and project management system enabling cross-team operations, built with Next.js, TypeScript, and Supabase with real-time data sync.

Bazaar - E-Commerce Platform with Product Quality Assurance *(NDA)*

Marketplace platform with built-in product quality assurance and safety verification workflows, designed for more trustworthy consumer-to-consumer and business-to-consumer transactions.

Beauty Connect - Salon and Clinic Booking Marketplace *(NDA)*

Multi-vendor platform enabling salons, barbershops, and aesthetic clinics to manage appointment bookings and sell products directly to consumers through an integrated marketplace.

[MGC Architecture](#) - Digital Transformation Platform

Solo full-stack digital transformation for an architecture studio: portfolio showcase, interactive construction cost calculator, inquiry handling, and admin CMS. Built with Next.js, TypeScript, Tailwind CSS, GSAP, and Supabase to replace manual inquiry and costing workflows.

[Kadokohi Coffee Shop](#) - Solo Full-Stack PWA (Ongoing)

Permanent freelance engagement. Solo-built digital transformation from manual cafe operations to QR/online ordering, PayMongo payments, POS, and SMS/email automation on Next.js and Supabase—supporting higher revenue capacity and leaner operations.

[Offgrid Lifestyle](#) - Solo Full-Stack E-Commerce (Ongoing)

Permanent freelance engagement. Solo-built merchandise e-commerce digital transformation with PayMongo checkout, SMS status updates, and SEO on Next.js/Supabase/Vercel—expanding online revenue channels and reducing manual order handling.

[Hakum Auto Care](#) - Auto Detailing Operations Platform (Full Revamp)

Revamped full-stack ops platform (React, Supabase, RLS/RBAC) with live queue management, geofenced staff attendance, multi-branch role-based access, customer portal, POS system, and BusyBee SMS integration for booking, payment, and completion notifications.

EMS Full-Stack - Employee Management System

Full-stack employee management system with role-based access control, built using React, ASP.NET Core, and PostgreSQL, deployed on Vercel and Railway.
